C. RELEVANT CASE INFORMATION:
- The applicant is proposing to split the existing farmstead from the 75 acre farm.
- The proposed 10 acre parcel will include the existing dwelling and all farm structures, along with existing pond.
- The property is currently served with private septic and well, propane gas and OPPD for power.
- Parcel will have access from 108th Street.
- The dwelling on the parcel, constructed in 1968, does not currently meet the 100’ set back required in AG zoning. The residential structure is a legal non-conforming use as the required setback was 35 feet when it was constructed. With the dedication of the additional right-of-way and the change of zoning, the dwelling will have a new set back of 28’ which will not meet the AGD zoning set back requirement of 70’. Thus the structure is grandfathered as a legal non-conforming structure and will be subject to the non-conforming use regulations as it was previously.

III. APPLICABLE REGULATIONS
A. SARPY COUNTY COMPREHENSIVE PLAN
- CHAPTER 3: Land Use & Growth Management
  Future Land Use – Map 12 Future Land Use Map classifies this site as Residential Estates. The proposed development would be consistent with this future land use designation.
  Future Land Use – Growth Management – Map 13 Growth Management Zones designates this site as being within the Rural Development Zone. The Residential Estate land use area is intended to accommodate large lot residential development. It is intended to accommodate continued low density development in rural areas. Generally, these areas are not currently served by municipal utilities, and are not planned to be served in the future. As current conditions provide, these areas are best served with individual wells and septic systems. Residential Estate areas are generally located along the periphery of communities and the county where land use is less dense, sharing similar qualities with neighboring Agricultural land use areas.
Characteristics of the RE category include:
- Location in areas where public utilities are not available,
- Location in areas determined to have unique or sensitive natural areas, including
stream corridors, tree stands, wetlands, and natural habitat areas.
- The larger lots allow for greater potential to preserve natural amenities through the use of conservation easements and common open space,
- Accessory buildings may be allowed at a scale between typical suburban development and farm buildings,
- Uses within this area include single-family residential in accordance with appropriate zoning districts, churches, parks/recreation/open space, and associated accessory uses.

- Development Density – **Figure 19 Residential Development Decision Matrix** allows densities greater than 5 acres per unit with individual well and septic systems being provided. The proposed plat meets this requirement.
- Conservation Provisions – **Map 14 Environmentally Sensitive Areas** identifies Environmentally Sensitive areas that should be preserved as open space in the form of platted outlots designated as conservation easements. The policies in this area of the Comprehensive Plan apply to subdivisions comprised of lots smaller than 20 acres in size. Area of this site is man-made pond which is being preserved.

**CHAPTER 4 – Infrastructure**
- The site is outside of any areas planned for future public wastewater services.
- Wellhead Protection Area – **Map 16 Sarpy County Wellhead Protection Areas** indicates that the site is located outside of any well head protection areas.

**CHAPTER 5 – Transportation**
- Federal Roadway Functional Classification – **Map 17 Sarpy County Federal Roadway Functional Classification** identifies 108th Street as a Minor Collector roadway.
- Anticipated Full Buildout Street Network – **Map 21 Sarpy County Anticipated Full Buildout Street Network** shows 108th Street as a minor collector.
- Proposed access points to the site:
  - The property is served with one access driveway from 108th Street.
  - Fifty feet of right-of-way is being dedicated for 108th Street along the frontage of the proposed lot.

**B. APPLICABLE REGULATIONS:**
- Section 10, AGD (Agricultural Development District- 10 acre minimum lot size)
  - 10.1.7 – Single family dwellings, as proposed by this application, are a Principal Permitted Use
  - 10.3.1 – Accessory Buildings (existing farm structures) are allowed as Principal Permitted and Accessory uses.
  - 10.4.1 – Minimum Height and Lot Requirements:
    - Lot Area – 10 acres minimum
    - Lot Width – 300 foot (measured at the front yard setback line)
    - Front Yard Setback – 70 feet
    - Side Yard Setback – 50 feet
    - Side Yard Street Setback – N/A
    - Rear Yard Setback – 50 feet
    - Maximum Height – 35 feet

The final plat submitted meets the requirements with the exception of the existing single-family dwelling which is a legal non-conforming structure and is subject to the non-conforming use regulations.
B. OTHER AGENCY REVIEW/COMMENTS: The applications were sent to various jurisdictional agencies and departments within Sarpy County that may have an interest. No comments were received as of the date of this report.

C. GENERAL COMMENTS:

- **Change of Zone**
  - Proposed zoning of AGR is compatible with the Residential Estates land use designation in the Comprehensive Plan.

- **Preliminary/Final Plat**
  - The preliminary plat and final plat for one ten-acre parcel is in compliance with the zoning regulations and comprehensive plan.
  - The dwelling on the parcel will be subject to the non-conforming use regulations, as it does not meet the required front-yard setback requirements for the proposed zoning.

IV. PLANNING COMMISSION RECOMMENDATION:
