Re: SID 260, Palisades, 3-Way Stop at 171st Avenue and Palisades Drive Intersection

Mr. Kosa:

Attached you will find a plan for the proposed 3-Way stop at the intersection of 171st Avenue and Palisades Drive, located within SID 260. Our office has received numerous complaints about this intersection from residents regarding the safety of children walking to and from Palisades Elementary School. Students utilize the sidewalk/trail along Palisades Drive as a route to the school. Once students get to the intersection of 171st Avenue and Palisades Drive, they use this intersection as a crossing point to access the sidewalk on the school property which is located a little over 100 feet from the intersection. By installing the additional stop signs at this intersection, it will create a much safer crossing on an already heavily used route to and from the school for neighborhood kids. According to Section 2B.07, Paragraph 5B of the MUTCD, multi-way stops may be considered when there is a “need to control vehicle/pedestrian conflicts near locations that generate high pedestrian volumes”, which is the school in this case.

Thank You
